[THE BOOK]

This religious entity [IRS] promised land (America) with its dutiful historical birth; according to the "Department of the Treasury, Internal Revenue Service, publication #1694 (12-92) catalog # 15087" existence beginning in the year of "1646"; shortly after pilgrims landing at Plymouth Rock, Massachusetts. The pilgrims brought with them their religion; also the *IRS genesis* of the Kings' taxing/tithing system of the Church of England. A germane fact, since the U.S. government did not exist in the year "1646", but according to the Defendants the "IRS" did. This entity is the semblances of religious syncretism and is re-writing not just our Nation heritage; but writing our personal history, core values and religious beliefs. This offense will not withstand constitutional muster. This entity, like Scientology is a religion of reality. IRS website: "How well do you really know us? We may just surprise you, because we're more than just the nation's tax collection agency." See http://jobs.irs.gov/about/about.html because being more than just the nation's tax collection agency is not a proper separation between church and state influences, inter alia.

It is apparent many people seek to know the unknowable or understand things that touch the heart of the existing order and this seems to be a visible aim of many, if not most religions. However, every individual person believes in and practices things differently even if they believe they belong to the same religion. Such is the inescapable fact of life or religion: no two people read the same book and are left with the same exact understanding or meaning; just as no two people belonging to the exact same religion hold to the exact ways or believes every set of beliefs of their fellow members or adherents as they hold to be true. Many people believe you can find "religion" in a book, The Holy Bible, Koran, and Torah are the dominant one. It is a fact that many *traditional religions* have "a distinct religious history" and "a definite and distinct ecclesiastical government" and even "a distinct legal existence, literature of its own" or "a formal code of doctrine and discipline". In the year "1646" the King of England had all of those religious characteristics as he believed in, The Divine Right of Kings or divine right as a political and religious doctrine of royal and political legitimacy. Defendants' religious Orthodoxy of THEIRS is the establishment of those same core values.

A Religion of Reality- Taxology

Taxing the Human Spirit before 1776 & with its "faculty" tax... existing as the "returns and gains" from our Intellectual Tithing, a most sacred property and... the property which every man has in his own labor, as it is the original foundation of all other property, so it is the most sacred and inviolable...

..things that touch the heart of the existing order.

Preface

The approach of April 15 each year brings a flood of questions into the IRS. Questions from taxpayers about how to fill out their tax forms. Questions from citizens a possible properties of the properties of th how to fill out their tax forms. Questions from citizens on why we pay taxes and what the money is used for. Questions from the media on various aspects of our tax system to write about during this period of heightened interest. And on and on.

This volume is intended to provide IRS employees and the public with information on the evolution of our tax system, from the colonial era to the present. Presented in a chronological format, this book will be a basic reference source to answer

pasic reference source to answer questions about when things happened. The "why" of most events in the history of tax administration will be left to future publications of the IRS History and Archival Services

IRS History and Archival Services
Program.

The historic role of taxation in the
formation and growth of the United
States is a vast topic that encompasses
areas ranging from tax policy to tax
administration to processing technologies to personnel practices and a myriad of other subjects. This volume
does not attempt to be comprehensive. Rather, the intent is to provide
the user with a handy reference tool
to respond to basic questions.

Many entries may appear incomplete or confusing. Rather than
omitting such entries, they are
included because they provide some
insight into the evolution of our tax
system. Sources on the history of taxation are somewhat scarce, making
research in this field quite challenging. It is my hope that this volume
will be a first step in expanding

research into the fascinating subject of tax administration as a defining

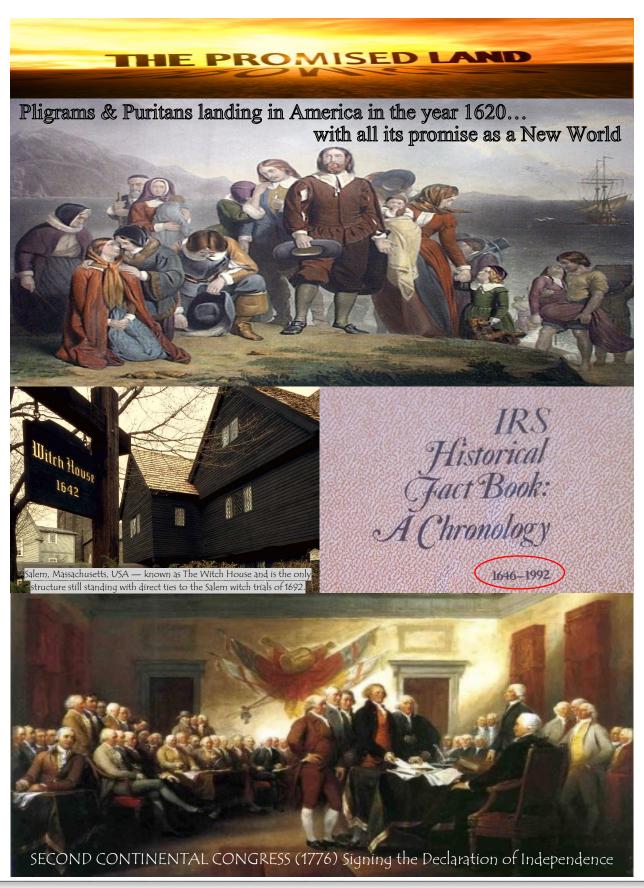

Also, it must be noted that while Also, it must be noted that while many topics are covered in this volume, many are not. This is the first in what will be a continuously updated, expanded and improved "Fact Book." With this in mind, users of this work are asked to call or write the IRS History and Archival Services Program with additions and corrections for the next edition.

To make this work as helpful as possible, two indexes are included. The first is a subject index to direct the user to topics of interest. The second is a date index, which can be used by those wanting to know what happened on "this day in history" in the IRS. The Introduction provides a brief historical overview of tax administration in the United States.

Frelley & Davis Shelley L. Davis
IRS Historian

Plaintiff [conscience] dictates:

"But freedom to differ is not limited to things that do not matter much. That would be a mere shadow of freedom. The test of its substance is the right to differ as to things that touch the heart of the existing order." West Virginia State Board of Education v. Barnette, 319 U.S. 624 (1943)

The Holy Cause of Liberty and Independence as seen through the eyes of self governance and by the hands of our own self determination; We The People have traversed the road to established "rights" with the *freedom to believe*... being absolute.
